

The euro zone in crisis

By [Catherine Mathieu](#) and [Henri Sterdyniak](#)

The 9th EUROFRAME Conference [1], which was held in Kiel on 8 June 2012, focused on economic policy issues in the European Union. The topic was “The euro zone in crisis: Challenges for monetary and fiscal policies”. [Issue 127 of the “Débats et Politiques” collection of the OFCE Revue](#) has published revised versions of twelve papers presented in the Conference[2], gathered in five themes: exchange rate imbalances, indicators of the debt crisis, budget rules, banking and financial issues, and strategies for resolving the crisis.

The analysis of the origins of the euro zone crisis and economic policy recommendations to get out of the crisis have been the subject of great debate among economists, which was illustrated in the EUROFRAME Conference. In the course of these articles, the reader will see several fault-lines:

– For some, it is the irresponsible policies of the South that are the cause of the imbalances: they have allowed the development of wage and property bubbles, while the Northern countries have been implementing virtuous policies of wage austerity and structural reform. The Southern countries thus need to adopt the North’s strategy and undergo a lengthy austerity cure. For others, the single currency has led to the development of twin opposing imbalances: this has led to under-valuing the economies of the North, which enabled them to offset their excessive policies on wage and social austerity with excessive external surpluses, and it has allowed the persistence of the South’s external deficits; this has resulted in the need for a controlled convergence, whereby recovery in the North facilitates the absorption of the South’s external imbalances.

– Some argue that each country must implement policies that combine a strong reduction in public spending – to absorb the

budget deficits and reduce the public debt burden – with structural reforms (liberalization of the markets for goods and services, deregulation of the labour market) in order to offset the depressive effect on the labour market. The financial markets have to be allowed to impose the necessary discipline on the countries. Others hold that the public deficits have to be tolerated as long as necessary to support economic activity, public debt needs to be guaranteed by the European Central Bank (ECB) to ensure that domestic interest rates converge at low rates, and an EU-wide growth strategy is needed (in particular to finance the investments required for the ecological transition).

– Some even believe that we must avoid any further extension of European solidarity, as it would enable some countries to put off the reforms needed, which would lead to persistent imbalances and thus to money creation and inflation. Others argue that errors have been made on economic policy since the inception of the euro zone, and that these have led to sharp disparities in the zone, which now need to be reduced by means of a coherent solidarity strategy. Europe is one big family and must demonstrate its solidarity and accept compromises to continue to live together.

– For some, ending the debt crisis of the euro zone countries requires the establishment of a fiscal union, which means the establishment of binding rules enshrined in the Fiscal Pact and a certain degree of fiscal federalism; the European Commission and Council should have a say on the fiscal policies of the Member States. Others think that the Member States should have a degree of autonomy to practice the fiscal policy they choose; this is a matter of both democracy and economic efficiency: the economic situations of the different countries are too diverse to invoke a uniform fiscal policy; what is needed is the open coordination of economic policy, without rigid pre-established standards on public finances, with the aim of ensuring satisfactory growth and the winding

down of external imbalances.

[1] [EUROFRAME](#) is a network of European economic institutes, which includes: the DIW and IFW (Germany), WIFO (Austria), ETLA (Finland), OFCE (France), ESRI (Ireland), PROMETEIA (Italy), CPB (Netherlands), CASE (Poland), NIESR (United Kingdom).

[2] Ten of which are in English and two in French.
